THE OUTER ISLANDS

Overview

With the most inhabited islands in all of Japan, some of the best beaches in the country and history dating back to the country's beginning, the Outer Islands should not be missed. Even with several of the islands being a little remote, there are ferries and flights that can take you to these breathtaking locations from Nagasaki, Fukuoka and even Korea!

GOTO ISLANDS

五島

The five islands of Fukue, Hisaka, Naru, Wakamatsu and Nakadori, along with over 140 smaller islands make up the Goto Archipelago. These idyllic islands are known for their beautiful beaches and refreshing mountain-top views, as well as camellia oil products, Goto udon, and delicious seafood. Steeped in Christian history, over 50 churches and Hidden Christian sites can also be found here.

IKI 壱岐

Iki, located in the north of Kyushu, is blessed with abundant pristine nature and the highest density of Shinto shrines, numbering at 150 (registered shrines). Learn about ancient Japan at the Ikoku Museum or explore a 2000 year old settlement. Iki is also a treasure trove of delicacies, boasting fresh seafood and locally brewed shochu liquor.

TSUSHIMA

対馬

The closest place in Japan to South Korea, Tsushima has played an important role in corresponding with the Korean Peninsula since ancient times and is a place of great historical value. Forests cover 89 percent of the island, and it is a fantastic destination for nature-lovers. You might even spot an endangered Tsushima Leopard Cat. Tsushima is only an hour's boat ride away from Busan, Korea.
